International Cartridge Corporation has developed a Frangible Lead-Free Special Duty Hollow Point. This ammunition is designed to create a safer more effective duty round for today's law enforcement. Conventional lead based duty rounds expand creating only one wound channel. International Cartridge's **Green Elite™ HP Duty** fragments and creates several wound channels giving a better chance for a one-shot stop. Additionally, **Green Elite™ HP Duty's** fragmentation properties significantly reduces the potential for damage/injury from ricochet.

Green Elite™ HP Duty

International's training rounds have been specifically designed to match the function and accuracy of our **Green Elite™ HP Duty** which allows for a seamless transition from training to duty.
