Green Elite™ TR & FR Training & Duty Rifle Ammunition

International's Green Elite™ TR & FR Training & Duty Rifle Ammunition is designed to deliver enhanced accuracy, with increased velocities at reduced pressures. In addition, the controlled fragmentation properties of the RTP (reduced tactical penetrator) allow tactical training on steel targets, which reduces splash-back and virtually eliminates damage to 1/4" AR 500 steel targets. Combined with the Lead-Free technology, the ammunition is designed for both training and duty applications.

Green Elite™ TR & FR Training & Duty RTP Rifle Ammunition is specifically designed for every day use in patrol rifles, as well as an elite tactical round for entry teams, SWAT teams and hostage barricade teams.

The controlled penetration technology, combined with the fragmentation properties, reduce the potential for injury / damage from shoot throughs and ricochet.

Standard replacement rounds carry the WTP and NTP designator. These rounds are not for steel target training, but are still Lead-Free frangible ammunition which meet military specifications for performance.
